

01 Transformer

03 CLIP多模态模型

输入处理 (分别提取文本、图像特征向量)

对比学习 (构建相似性矩阵)

CLIP 模型结构图 (预训练阶段的)

CLIP (Contrastive Language-Image Pre-training) 模型是一种多模态预训练神经网络，训练分为三个阶段：

1. Contrastive pre-training: 预训练阶段，使用图片-文本对进行对比学习训练；【本图中展示的】
2. Create dataset classifier from label text: 提取预测类别文本特征；
3. Use for zero-shot prediction: 进行零样本推理预测。
